FAQ

But if you have used windows you will find out that you are not even able to create bootable USB for macOS Mojave using CMD or PowerShell.. However, if you have used the Mac operating system, then you know that you can create bootable USB for Windows in mac with terminal and some other applications.. To use the program, you just have to insert the drive you
Congratulation: you have created MacOS High Sierra Bootable USB successfully on Windows without using any software or Mac computer.

Do NOT check the box to save the password in the Keychain else anyone who has access to your Mac can easily decrypt your DMG with a double-click.. Because of their File system, it seems to us that we can't create bootable USB for macOS Mojave on Windows.. However, if we compare the Terminal and PowerShell, Terminal is built upon the Linux Codes and Infrastructure.. It is we, the basic users who wish to use a different operating system However if you're using an SSD and/or El Capitan, read this article first.
